EDUCATION

Queen's University, Kingston ON — September 2022 – Present

- Bachelor of Computing (Honours) – Artificial Intelligence

Relevant Coursework: Algorithms & Data Structures, Operating Systems, Deep Learning (Python), Computer Networks, System-Level Programming, Computer Organization, Software Design & Communication

EMPLOYMENT EXPERIENCE

Sky View Suites – Fullstack Developer, Toronto ON — May 2025 – May 2026

- Developed and maintained full-stack features across a production booking and property management platform using React, TypeScript, NestJS, and PostgreSQL
- Built an internal admin dashboard that lets non-technical operations staff handle backend tasks on their own, reducing requests to the dev team and saving time for both operations and engineering
- Developed scheduled automation and reporting systems using CRON jobs, SQL queries, CSV generation, and AWS S3 uploads
- Implemented and enhanced booking, invoicing, tenant management, and cleaning workflow systems used daily by operations staff
- Contributed to corporate invoicing enhancements supporting multiple invoicing methods and validation workflows
- Built frontend interfaces and backend API endpoints within a microservice architecture using RabbitMQ for inter-service communication
- Worked with AWS services including S3, Cognito, IAM, and API Gateway for authentication, file handling, and backend integrations
- Investigated and resolved production issues by debugging frontend state management, backend services, SQL queries, and API responses
- Improved UI/UX flows for booking creation and tenant management through redesigned multi-step workflows and responsive React interfaces
- Collaborated with developers and operational stakeholders to scope, test, and deploy production-ready features

PROJECTS

QUANTT Algorithm Developer | C#, EMA, HMA, Donchian Channel Indicator — 2022 – 2023

- Engineered an intraday trading algorithm using EMA, HMA, and Donchian Channel indicators for live competitive trading simulations
- Collaborated in a small development team to architect, test, and optimize trading strategies; analyzed post-launch performance data to improve efficiency and debugging

Personal Portfolio Website | HTML, CSS, and JavaScript — 2022 – Present

- Designed and developed a responsive personal portfolio website with custom UI elements and animations showcasing projects and technical experience

Video-Game Development Project | C#, Unity Game Engine — 2022 – 2024

- Developed an arcade-style shooter game featuring enemy AI, gameplay mechanics, tutorials, and custom sprite systems, plus multiple smaller Unity projects

SKILLS

- **Programming languages:** TypeScript, JavaScript, SQL, Python, Java, C++, C#, HTML/CSS
- **Frameworks & Technologies:** React, NestJS, Node.js, PostgreSQL, Sequelize, TailwindCSS, RabbitMQ, REST APIs, Git, AWS (S3, Cognito, IAM, API Gateway)
- **Tools:** GitHub, Postman, TablePlus, Linux/Ubuntu, Adobe Photoshop, Premiere Pro, FL Studio
